Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 27-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 27, 29 and 30 is/are rejected.
- 7) ☒ Claim(s) 28 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

This office action is in response to an amendment after final filed 10/26/07. The amendment has been entered. Claims 1-26 have been cancelled. Claims 27-30 are pending in this application.

Claim Objections

Claim 28 is objected to because of the following informalities: in claim 28, a period --- following the phrase "amino acid sequence of SEQ ID NO:2" is missing.

Appropriate correction is required.

Claim Rejections - 35 USC § 112, first paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 30 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitation that the method of producing mature MANF2 comprises growing cells comprising nucleic acid encoding SEQ ID NO:2 that is produced "and cleaved by a signal peptidase between amino acids position 26 and 27" in the cell. Applicant has stated that support for this limitation is found in the specification specifically in example 6, which teaches that the

Art Unit: 1633

signal sequence is cleaved between amino acid 26 and 27. However, examiner has been unable to find support in the originally filed specification or example 6 for a step of amino acids 1-26 being cleaved by a signal peptidase. Furthermore, only mammalian cells COS have demonstrated the ability to produce a protein that is modified by cleavage of the first 26 amino acids. The specification teaches that cleavage of the homologous signal sequence is detected following transfection of the full-length nucleic acid into COS 7 cells and this reaction is the consequence of cellular factors that mediate the reaction. That these cellular factors are signal peptidase and that cells other than mammalian cells possess this ability are not disclosed. Therefore, the limitation that the method of producing a polypeptide results from transfection, growth and cleavage by a signal peptidase between amino acids position 26 and 27 is impermissible NEW MATTER.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 27 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Rosen et al (20060057582; see entire document).

Rosen et al teach an isolated sequence comprising SEQ ID NO:2 (see e.g. SEQ ID NO:286 and 203). As well, Rosen et al teach methods of producing the peptide (¶0007).
